PARAGRAPH EXPERIMENT (DATA TABLE AND GRAPH)

PARAGRAPH EXPERIMENT

Width (cm)	Height (cm)	1/Width
15.3	4.5	0.07
7.6	9.5	0.13
10.8	6.5	0.09
5.5	13.1	0.18
22.6	3.3	0.04

Height vs. Width for a Paragraph

Height (cm)   72.4*x + -0.0813
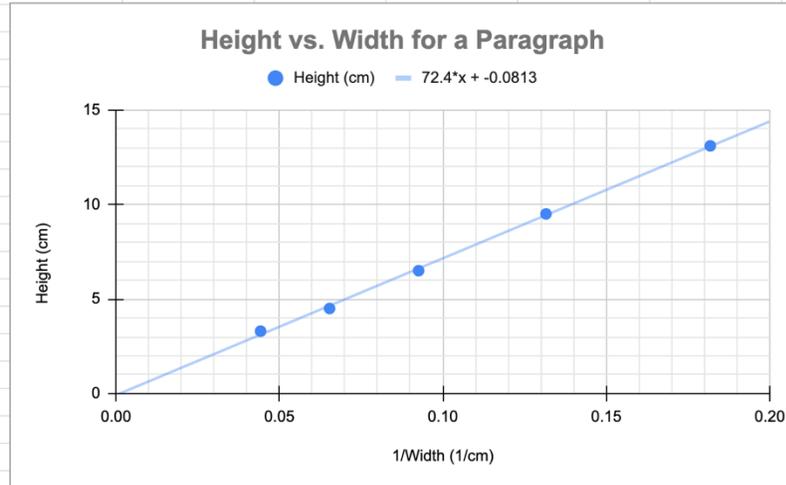

Things to check:
- Is your data table properly formatted? (Bold headings, everything centered, cell borders)
- Does your graph have a title and is it properly formatted?
- Are the axes of your graph labeled with the quantity name and its units?
- Do your axes have minor gridlines? (These are the gridlines that are between the ones that have labeled values)
- Do your axes have major tickmarks?
- Do the minor gridlines have steps that make it easy to estimate coordinates of points on the line that lie between the gridlines?
- Does your graph have a best-fit line?
- Does your graph show the equation of the best-fit line?
